Resindu's Journey in

MASTER OF
SOFTWARE
ENGINEERING

STUDENT SUCCESS STORY

1 Can you introduce yourself?

"Hi, I'm Resindu. I'm currently studying for a Master's in Software Engineering at Yoobee College, and I'm originally from Sri Lanka. I started the programme in July and aim to finish by August 2025."

2 What is your academic and professional background?

"I hold a Bachelor's degree in Software Engineering from Sri Lanka, where I graduated with second-class honours. After that, I worked as a software engineer for about two and a half years. I also helped out with my father's business, which led to a slight gap in my technical knowledge."

3 Why did you choose Yoobee to study MSE programme?

" I chose Yoobee for its project-based curriculum, which offers a lot of hands-on experience—something I really wanted. I also wanted to explore emerging technologies like quantum computing and blockchain. Yoobee's programme aligns with my career goals, especially since I'm looking to move into machine learning or data science. "

Student Profile

NAME
Resindu Navoda

NATIONALITY
Sri Lanka

COURSE
Master of Software Engineering (MSE) (Accelerated)

INTAKE
July 2024

DURATION
1 year

"You'll get a high-quality education that balances practical experience with cutting-edge technology."

4 **What differences have you noticed between studying in New Zealand and your home country?**

"New Zealand is very multicultural, and my classmates come from various countries and cultures, giving me a broader perspective. The teachers here are also really supportive and give individual attention to each student, which I really appreciate."

5 **What challenges have you faced while studying in New Zealand?**

"The biggest challenge was adapting to the language and culture. Even though I'm comfortable with English, it took a little time to adjust to using it constantly. The weather was another surprise—coming from a warm country, New Zealand's colder climate was something I had to get used to. But over time, I adjusted to both."

6 **What are your future plans after completing your Master's degree?**

"I'm planning to find an internship in data science or machine learning during my trimester break. Ultimately, I want to become a machine learning engineer or a data scientist and contribute to advancements in artificial intelligence."

7 **How would you describe your overall experience in New Zealand?**

"I love it here. The natural scenery is stunning, and the people are really friendly and welcoming. I feel comfortable living in New Zealand, and the IT industry, especially in AI, is growing fast—perfect for my career."

ADVICE TO PROSPECTIVE STUDENTS

"

IF YOU'RE THINKING ABOUT COMING TO NEW ZEALAND, I HIGHLY RECOMMEND IT. THE IT INDUSTRY IS BOOMING, AND THE SALARIES ARE COMPETITIVE. PLUS, YOU'LL MEET GREAT PEOPLE AND HAVE THE CHANCE TO EXPLORE A BEAUTIFUL COUNTRY.

"
