

# MASTER OF BUSINESS INFORMATICS – HEALTHCARE INFORMATICS STRAND

The Healthcare Informatics strand equips students with skills in healthcare data management, analytics, and system security, focusing on digital healthcare design and data safety. Through practical applications, students tackle complex data challenges to drive innovation and improve healthcare outcomes.

### Post Study Opportunities

International students who complete a degree or post-graduate qualification will have access to **Post Study Work Visa**.

It allows you to stay and work in New Zealand for up to 3 years, depending on your level of study and how long you studied in New Zealand.<sup>1</sup>

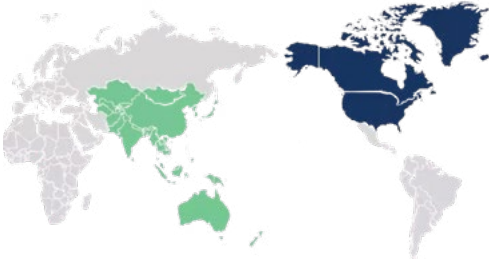

### Career Outlook

The Healthcare Informatics sector has grown significantly due to technological advancements and global healthcare reforms. The adoption of electronic health records, telemedicine, and big data analytics has boosted demand for professionals skilled in health data management and analysis.

The integration of technologies like AI and genomics into healthcare further elevates the need for tech-savvy experts capable of handling complex datasets and innovative systems. Key roles such as health informatics specialists, clinical data analysts, and health IT project managers are in increasing demand.

## Global Healthcare Informatics Market Regional Insights 2024

**Total Market Size: 39.55 Billion**

# WHY CHOOSE YOOBEE?

## SKILL GAP SOLUTION

This programme addresses the skill gap in New Zealand and globally, blending healthcare knowledge with informatics to help you manage health data, improve outcomes, and drive innovation. Master EHR systems, data security, and AI solutions to lead in modern healthcare.

## CUTTING-EDGE TECHNOLOGIES

Digital Healthcare Design, Health Analytics and Data Safety in Healthcare System, enabling graduates to respond to the latest tech developments.

## EMPLOYER-ALIGNED CURRICULUM

Constant curriculum reassessment ensures students gain skills that are in demand, with full access to industry-standard equipment.

## EXPERT GUIDANCE AT YOOBEE

Our industry-experienced tutors who not only have vast expertise but also excel in teaching, supported by partnerships with tech leaders.

## PRACTICAL ASSESSMENTS

No traditional exams; assessments are project-based, both individual and group, mirroring real industry practices.

## INDUSTRY-RECOGNISED CERTIFICATIONS

You can access to AWS certifications and IBM Digital Badge Certifications, along with an opportunity to receive a data-rich digital badge from Cisco Networking Academy. These are all recognised in the tech industry, enhancing your career opportunities.

AWS certifications are globally recognized professional credentials offered by Amazon Web Services. It validate students' expertise in cloud computing and AWS services.

Cisco badge is a digital credential from Cisco Networking Academy, widely recognized in the tech industry.

IBM certifications validate students' proficiency in IBM's technologies and solutions.

YooBee is a member of Health informatics New Zealand. Students can access to networking opportunities, professional development events, and insights into health informatics trends.

# Master of Business Informatics – Healthcare Informatics, Level 9

## QUALIFICATION

Master of Business Informatics

## DURATION

1 year (3 trimesters)

## NZQF LEVEL

Level 9

## 2025 INTAKES

7 April, 28 July, 17 November

## CAMPUS

Auckland, Christchurch

## TUITION FEE

\$36,000 NZD

## RESOURCE FEE

\$2,000 NZD

## ADMINISTRATION FEE

\$400 NZD

## SCHOLARSHIP

A NZD \$10,000 scholarship is available for a limited number of students.

### How to apply:

- Submit a personal statement **OR**
- Participate in a scholarship interview.

## WHAT WILL YOU LEARN?

### TRIMESTER 1

Start with foundational learning in strategic information systems, data management, and research methods, essential for analysing and interpreting business data.

#### ▪ Strategic Information Systems Planning

You will learn to critically evaluate current systems, identify opportunities, and develop tailored solutions for complex challenges in business settings.

#### ▪ Information Systems Analysis and Design

You will learn to evaluate data models, apply user-centered design, and implement various SDLC methodologies.

#### ▪ Database Management Systems

You will explore data warehousing and business intelligence by developing skills in database design, SQL querying, and data security, emphasising ethical and cultural considerations, including Māori data ownership under Te Tiriti o Waitangi.

#### ▪ Research Methods

You will have the opportunity to learn about Kaupapa Māori research frameworks and ethical considerations for working with indigenous communities.

### TRIMESTER 2

Develop expertise in data analytics and warehousing to drive informed business decisions through practical business strategy skills.

#### ▪ IT Project Management

You will gain expertise in project planning, budgeting, scheduling, and risk management, learning to select and apply the right project management methodologies, such as Agile, Waterfall, and PRINCE2.

#### ▪ Digital Healthcare Design

You will learn to create user-centric solutions for healthcare challenges. The curriculum covers a wide range of technologies, including EHRs, telemedicine, and mobile health apps, with a focus on improving patient care and organizational efficiency.

#### ▪ Health Analytics

You will learn to ethically analyze diverse healthcare data to improve patient outcomes, optimize operations, and support evidence-based decision-making.

#### ▪ Data Safety in Healthcare System

You'll learn to evaluate the risks to healthcare data security, including cyberattacks and breaches, and develop strategies to mitigate these threats.

### TRIMESTER 3

Through a capstone project, you'll tackle a real-world issue in business analytics, honing your skills in data interpretation and solution-oriented analytics for industry application.

## SOFTWARE

Throughout your study you will use a range of open-source software. Yoobee will also offer subscriptions with IEEE Xplore, computer society digital library (CSDL) and O'Reilly digital media.

## EQUIPMENT

You are required to bring your own device. This allows flexibility of study outside of class hours. If you do not own your own device, please discuss this with one of our team at enrolment.

Components of your device	Minimum Specs	Recommended Specs
CPU	Intel Core i5, or better	Intel Core i5, or better
Memory	8 GB	16 GB
Disk	256 GB SSD	512 GB SSD
Screen Resolution	1280 x 800	1920 x 1080

## Entry Requirements

International students must be at least 18 years old when commence the course.

### ACADEMIC

- A Bachelor's Degree or Graduate Diploma in informatics or health-related subject from a recognised institution, **OR**
- Evidence of acquiring the relevant skills and knowledge through appropriate work or professional experience in healthcare data management, analysis or a related area.

### ENGLISH

IELTS 6.5 (Academic) with no band lower than 6.0 or equivalences approved by NZQA.

## Employability

Pay for business analysts varies depending on skills, experience and where you work, with pay in Auckland being higher.

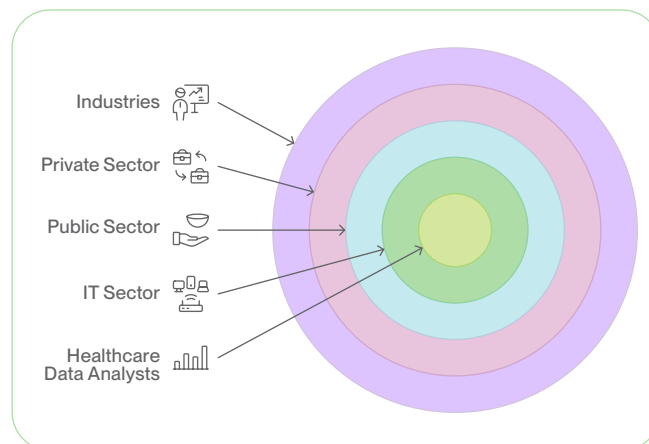

- » **Business analysts usually earn**  
**\$90K to \$140K**
- » **Senior business analysts can earn**  
**\$120K to \$160K**
- » **Team leaders and managers can earn**  
**\$150K to \$180K**
- » **The median business analyst salary in New Zealand**  
**\$100,131 per year      \$51.35 per hour**

Note: campus availability might be subject to change in each intake. International Tuition and Resource fees are in New Zealand Dollars and include GST. Every effort was made to present accurate information in this publication at the time of publication 29 November 2024. UP Education reserves the right to change this information at any time.

## Job Opportunities

### DEMAND FOR HEALTHCARE ANALYSTS

Demand for healthcare data analysts is high due to:

- Public and private sector employers who need healthcare analysis skills.
- The need for skilled healthcare analysts in the IT sector.

### BRIDGING THE SKILLS GAP IN HEALTHCARE IT

There are not enough experienced business analysts to meet demand. Nearly two thirds of IT employers report skills shortages, and there aren't enough IT trainees.

Healthcare Informatics graduates are in high demand across medical practices, hospitals, health IT startups, government agencies, and private sector corporations, including insurance companies and pharmaceutical firms.
